

What I liked the most.

My favorite part activity out of everything we did this week was the mosaic work we did. It was really fun and it was a good learning experience for me because it was/is the first time. I have known the general definition for the word mosaic but I did not put into perspective how it would be to make one. I think it will be really fun to do something like this. And if all goes to plan, I can see myself taking pride in the work that my friends and I have done.

I hope the project works and it comes out great. It will make Braddock that little bit more interesting and it will add one more event to my collection of memories.
