

# Impactful week

The most impactful thing i think we did this week was. When we did the fashion show. We had not a lot of materials to make a outfit out of. We little things like paper bags and paper towels. We work as a team and bring our minds together. Another thing was when we came up the ideas for the mosaic. We all draw our own design and then figured out how to collaborate with each other. And came up with something very nice. The reason i picked these to out of the whole week is because we started off individually and at the end came together as a team.
